e-zynet Launches New High Power 15Mb/s Wireless EZ-Bridge™ System

Sept 4, 2008 - Draper, Utah – e-zynet is pleased to announce the release of their new high power wireless EZ-Bridge™ system with 15Mb/s thruput and 4 miles secure operation. The new 250mW wireless bridge is preconfigured at the factory for true plug and play operation.

“The high performance, ease of use and low installed cost make this system useful in a wide range of business and personal applications,” said Scott Parsons, COO. “With its high power output, low receive sensitivity, 15Mb/s thruput and state of the art security, the EZ-Bridge™ is the perfect system for extending internet access, linking multiple buildings, home office to work office connectivity, remote sensing and remote video surveillance, to name a few.”

The new EZ-Bridge™ wireless network bridge systems come complete with everything needed for a typical installation. The bracket accommodates pole mounting or wall mounting, with azimuth and tilt adjustments standard. Key specifications include: 250mW, 802.11b/g, 15Mb/s, WPA2 encryption, 15dBi Antenna, 2400-2500MHz.

* MSRP \$329.95

About e-zynet

e-zynet designs and manufactures both short and long range high speed wireless communications products.

The company's indoor and outdoor WLAN products are standards based to insure interoperability. In addition to a line of standard 802.11 products, e-zynet also develops customized wireless products to meet specific OEM customer requirements.

Headquartered in Veria, Greece, e-zynet also has offices and warehouse facilities in the USA and representatives worldwide.
