e-zynet Introduces New Industrial Strength Wireless EZ-Bridge™ System

February 9, 2010 – Draper, Utah – e-zynet is proud to announce the release of the latest product in the line of EZ-Bridge™ high power outdoor wireless systems. The complete system is available in either 2.4GHz or 5GHz unlicensed frequency spectrum providing real world throughput up to 20 Mb/sec.

“The extra protection from lightning strikes and power line surge protection makes this version of EZ-Bridge™ one of our best systems ever,” said Rick Thomas, sales and marketing manager. “The industrial strength makes this the perfect wireless network connector for heavy duty usage. The ability to link multiple buildings in a wireless setting has tremendous application for personal and business use.”

The new EZ-BridgeLT-HD™ creates a transparent wireless bridge between two networks up to 3 miles apart with good line of sight. The complete system comes with two 75’ shielded outdoor rated Cat5 cable assemblies to protect against EMI caused by lightning. Also included with the units are two powerful 14dBi 802.11a antennas with built-in high power electronics; Bracket Kit which accommodates pole or wall mounting; Surge Protected 18V POE (Power Over Ethernet) power inserters. Installation is a snap because of the plug and play features built into the system.

*** MSRP Starting at \$329**

About e-zynet

e-zynet designs and manufactures both short and long range high speed wireless communications products.

The company's indoor and outdoor WLAN products are standards based to insure interoperability. In addition to a line of standard 802.11 products, e-zynet also develops customized wireless products to meet specific OEM customer requirements.

Headquartered in Veria, Greece, e-zynet also has offices and warehouse facilities in the USA and representatives worldwide.
